

## Automation Systems, Integrated Equipment & Machining

JH Robotics has more than 25 years of Automation and Robotics experience. We have provided Turnkey Systems for just about every kind of industrial application. Along the way we have gained valuable integration expertise ranging from Accumulators to Washer Systems.

The following is a partial list of the types of equipment we have manufactured or integrated into our turnkey automation systems:

- |                                |                                      |                      |
|--------------------------------|--------------------------------------|----------------------|
| Accumulators                   | Gantries                             | Prototypes           |
| Adhesive Dispensers            | Grease Dispensing                    | Saws                 |
| Assembly                       | Grinders (Mfg. or Load/Unload)       | Scales               |
| Bar Feeders                    | Heat Shrink Systems                  | Shears               |
| Bowl Feeders                   | Hydraulic, Air/Oil & Air Presses     | Shrink Wrap          |
| Broaching Equipment            | Laser Marking                        | Sound Test Systems   |
| Check Weighing Systems         | Machining (Contract-CNC Mill & Turn) | Spindles             |
| CNC Milling (Load/Unload)      | Marking Equipment                    | Stamping             |
| CNC Turning (Load/Unload)      | Measurement Probes                   | Touch Screen HMI's   |
| Conveyors (Custom or Standard) | Molding Machines (Load/Unload)       | Tubing Assembly      |
| De-Burring                     | Packaging & Packaging Systems        | Ultra Sonic Cleaning |
| De-Flashing                    | Paint Systems                        | Ultra Sonic Welding  |
| EDM Machines (Load/Unload)     | Palletizing                          | Vision               |
| Fastening                      | Press Systems                        | Washer Systems       |
|                                | Robots                               |                      |
