

COMPANY OVERVIEW

WHO WE ARE

JH Robotics, inc was founded in 1983 and is the leading east-coast Fanuc Authorized System Integrator with extensive experience in robotic system integration. The company offers both turn-key solutions and highly customized automation that allows our customers to have a single source vendor for a complete automation solution.

With nearly 600 FANUC robotic integrations deployed in a diverse range of industries, our highly experienced engineers, technicians and tool-makers all have years of experience designing, building, and debugging automation systems.

We have provided complete turn-key systems for the following industries: Automotive, Pharmaceutical, Industrial, Paper Products, Electronics, Medical, Aircraft, etc. Within these industries we have designed, developed, and built Robotic System Solutions for the following applications: machine load/unload, packaging, pharmaceutical processing, machining, injection molding, palletizing and many more.

Everything JHR designs, builds and performance tests are within our facility.

JHR SERVICES

- Design, Build & Test Automation
- FANUC Robot & PLC Programming
- Engineering Design Services
- CNC Machining - Turning & Milling
- Electrical Panel Design/Build

JHR TECHNOLOGY

- Robotics
- Conveying
- Palletizing
- Vision Systems
- Material Handling Systems
